PROFESSIONAL PROFILE:

Informatics and Computer Science graduate from Strathmore University with over 3 years of experience in web development. Experienced in building AI agents using LangChain and deploying full-stack applications. Developed a machine learning-based Network Intrusion Detection System (NIDS) leveraging adversarial training to enhance robustness against evasion attacks.

WORK EXPERIENCE:

Junior Frontend Developer
Zuri Health · Nairobi, Kenya | **May 2026 – Present**

- Developing and maintaining user-facing features for Zuri Health's web applications.
- Translating UI/UX designs into high-quality, responsive web pages.

Frontend Developer Intern
Zuri Health · Nairobi, Kenya | **Jan 2026 – Apr 2026**

- Resolved more than 15 critical bugs across authentication, responsiveness, and checkout workflows on the Zuri Health Website, improving platform stability.
- Optimised pharmacy checkout flows, increasing checkout completion rates by 25%
- Provided on-site technical support during 4+ medical camps across Kenya, ensuring reliable system performance in real-world healthcare environments.

IT Intern
Zuri Health · Nairobi, Kenya | **Jan 2025 – Apr 2025**

- Developed a Hospital Management System using React, Django, and MongoDB.
- Documented more than 20 REST API endpoints on Postman for the hospital management system.
- Contributed to end-to-end testing of Zuri Health's mobile application, identifying and reporting more than 10 bugs in the user flow, increasing user engagement by 30%.

SKILLS:

- **Programming Languages:** TypeScript, Python, PHP
- **Web Development Frameworks:** Next.js, FastAPI, Laravel, TailwindCSS
- **AI & ML Frameworks:** LangChain, LangGraph, Scikit-Learn, TensorFlow
- **Databases & Infrastructure:** MongoDB, PostgreSQL, Docker, Redis

PROJECTS:

Robust Network Intrusion Detection (Apr – Nov 2025)

- Developed a machine learning-based NIDS to detect malicious network activity and improve robustness against adversarial evasion attacks.

- Applied adversarial machine learning techniques, enhancing resilience against evasion attempts by about 15%
- Designed and developed a full-stack monitoring dashboard using FastAPI and Next.js. GitHub Repository – Robust Network Intrusion Detection

CreditExplain (Aug – Sep 2025)

- Developed an advanced RAG system for financial compliance using LangChain, FastAPI, and React 18, based on the Self-RAG architecture.
- Ingested more than 10 regulatory documents from Kenya and Nigeria for improved question-answering.
- Placed 2nd among 10-15 teams at the NSK.AI RAG bootcamp hackathon. GitHub Repository - CreditExplain

CERTIFICATIONS:

September 2025	NSK.AI: Introduction to AI Agents
October 2024	Safaricom Engineering: Software Architecture and Automation
December 2023	CCNAv7: Switching, Routing, and Wireless Essentials
March 2023	CCNA v7: Introduction to Networks

EDUCATION:

Bachelor in Informatics and Computer Science	**Jul 2022 – Feb 2026**
Strathmore University, Kenya	
Completed; degree to be conferred in Aug 2026	
Kenya Certificate of Secondary Education (KCSE)	**Jan 2018 – Apr 2022**
Mount Kenya Academy, Kenya	Mean Grade: A- (77 pts)
